

## **FACT SHEET**

June 2012

### **EA 0C7404: Marin 101 Capital Maintenance (CAPM) Paving Project**

#### **Project Location:**

In Marin County, on U.S. 101, in and near Sausalito, Corte Madera, Larkspur, from Golden Gate Bridge to Corte Madera Creek.

#### **Need and Purpose:**

The freeway and ramps pavement within project limits is showing distress and is in need of repair, which when left uncorrected will deteriorate to major roadway rehabilitation. The purpose of the project is to preserve the existing pavement structural section and extend the pavement service life for at least 5 years. The project will reduce the future maintenance costs and also improve the ride quality and overall freeway system performance.

#### **Scope:**

The project will replace severely damaged asphalt concrete (AC) pavement sections with new asphalt concrete pavement and place a preventive overlay of asphalt concrete on the mainline and the on/off ramps. The project will also replace or reconstruct metal beam guard rails at various locations. Most work will be performed during night time. Some of the freeway lanes will be closed to perform this work. On/-off ramps will be closed only at night for paving and reopen for traffic during the day. Drivers have to detour per approved detour plans during ramp closure.

#### **Schedule:**

Construction begin: May 2012

Construction complete: October 2012

#### **Project Cost:**

Engineer's estimate: \$24,413,000

Current contract allotment: \$23,961,000

Contractor: Ghilloti Brothers, Inc, San Rafael, CA
